

Hello,

It is with great pleasure and excitement we announce the addition of the Contour Light Program in our office.

The Contour Light Program blends science and physiology to help you become healthier and lose inches off of those hard to effect places like the waist, chin, thighs and arms. The Contour Light Program treats all the areas on the body that are resistant to diet and exercise. In fact, many Contour Light patients lose between 7 to 20 inches of fat in less than a month!

In the past, if a person wanted to lose fat this quickly, their only choice was a difficult-to-follow diet plan and a strenuous exercise regimen. This was a time consuming, daunting task and not possible for everyone to accomplish.

The Contour Light Program offers simple nutritional suggestions and easy exercise options combined with a 30-minute treatment to help you lose stubborn fat. The Contour Light treatment is totally painless. You can expect to feel a gentle, warm sensation. Most patients read, listen to music, or take a nap during the 30-minute treatment.

The Contour Light Program is safe for nearly all individuals. There are zero side effects. The treatment is painless and many patients see same day results! The best part about the Contour Light Program is that your normal activities can be resumed immediately following the treatment.

Needless to say, we are very excited about this tested and proven technology and would love to tell you more about it. If you would like to improve your health and experience rapid fat loss in a safe and effective manner, please contact the office to schedule your no charge, no obligation Contour Light consultation. If you would like to get started, mention this letter when making your appointment and receive a special discount!

We look forward to hearing from you soon!

**Is your waist in
a tight spot?**

**Lose 5 to 20 inches
in less than a month!**
